**PRESS RELEASE**

## **EIMA Gulf: 2011 edition postponed**

The EIMA Gulf international review of agricultural mechanization, organized by Unacoma Service in cooperation with the Abu Dhabi National Exhibitions Company (ADNEC) and scheduled for next April 18 to 20, has been postponed sine die.

Varying degrees of political turmoil in countries in North Africa, the Middle East and parts of the Arabian Peninsula are preventing the realization of an event truly worthy of fulfilling expectations.

The United Arab Emirates, the organizers explained, represent not only a market in themselves but also a strategic crossroads for businesspeople throughout the vast area surrounding them.

Only with the reestablishment of stable political and economic conditions will it be possible to restore the very commercial dynamics which have made of the UAE an important point of reference for Italian industry and especially the entire sector of agricultural mechanization.
